Frisco Eye Associates offers a state-of-the-art digital scanning technology that allows us to view the inside of your eye without the use of dilation drops. The OPTOMAP allows us to evaluate your retina for problems such as macular degeneration, retinal holes, retinal detachments, hypertension and diabetic retinopathy. The scanning system is completely safe for kids and adults and allows you the opportunity to see the inside of your eye just as the doctor sees it.

**Dilated Exam**

*vs.*

**Optomap Exam**

1. Blurred near vision for 4-6 hours
2. Light sensitivity for 4-6 hours
3. Longer office visit to wait for drop to take effect
4. No permanent record of retina
5. Only the doctor can see the retina

1. NO blurred vision
2. NO light sensitivity
3. Map takes less than 2 mins to process
4. Permanent digital image that can be reviewed/compared each year
5. You can see your retina

**Early Detection is Crucial!**

Our doctors recommend that ALL patients have a thorough examination of their retina every year. **Without the Optomap or a dilated examination, the doctor cannot fully assess the health of your eye.** There is an additional fee of \$34.00 for the Optomap. In most cases, this procedure is not covered by insurance. **Dilation may still be required in rare instance.**

\_\_\_\_\_ I elect to have a digital photo of my retina today (\$34.00)

\_\_\_\_\_ I prefer a dilated exam of my retina (no additional fee)
